

Challenging YOU

EDUCATORS

Invest in the Future

BE PART OF THE SOLUTION

You, your fellow educators, and academic institutions already make a difference for our youths but, we are challenging you to go a bit further. Consider some of the following options and engage with our future cyber defenders and leaders with opportunities like:

- Engage not only with the students but, include parents and community
- Build and foster your community relations
- Engage mentors from the business community
- Provide opportunities for senior students to mentor and help train lower classmen
- Participate with your local Community College programs in the Information Communication Technology/Cyber Advisory (CTE) meetings
- Help structure the onboarding of students into internships and apprenticeships – lay the groundwork
- Provide hands-on opportunities for students
- Explore all avenues with passion

We are here to help you help. Let's work together to provide opportunities for our youths. Email us at:
