

Challenging YOU

GOVERNMENT LEADERS

Invest in the Future

BE PART OF THE SOLUTION

You, your fellow officials and state/national leaders can make a difference for our youths. We are challenging you to go a bit further. Consider some of the following options and engage with our future cyber defenders and leaders with opportunities like:

- Engage with local and statewide cyber programs
- Offer certificates to cyber program participants
- Provide active presence at community events, such as the CMCC, to show viable support
- Provide quotes for press releases (local and national) and web site (Both CMCC and School & Community Cyber Programs)
- Engage cyber students and community members in civic and statewide presentations and opportunities
- Offer shadowing opportunities for advanced students – look at government policies and how cyber is intertwined with cause/effect

We are here to help you help take an active role with our future cyber leaders and defenders. Let's work together, now and into the future! Email us at: cmcc@ca-cyberhub.org
